

Pesticide Risk Reduction Education Short Course on Maui in April 2018

This announcement may be downloaded from pestworld.stjohn.hawaii.edu/pat/schedule.html.

This in-depth two-day short course is about handling pesticides, including herbicides, in ways that will reduce risks to people and our environment. It will be conducted by an instructor from the Cooperative Extension Service, a part of the College of Tropical Agriculture and Human Resources, University of Hawaii at Manoa.

Who would benefit?

This course would benefit people who want to be better informed about handling pesticides properly or prepare for the Hawaii Department of Agriculture's examination for *restricted use* pesticide certification. (The exams will be conducted at separate sessions by Hawaii Department of Agriculture employees.)

Certified applicators will not earn recertification credits by attending this course.

Topics

The instructor will emphasize the study packet's basic or "core" study guides, which provide information common to all categories of restricted use pesticide certification. But "category-specific" topics such as life cycles of specific pests and specialized equipment and calculations are covered only in the category-specific packets of study guides, not in the short course. So if you plan to take a certification exam, you should also study the "category-specific" study guides, such as the "Private 1,2,3 study packet" or the "Commercial 2 Forest pest control study packet" or the "Commercial 7a,b,c,d,e pest control study packet."

Topics to be covered in the short course include:

- Types & formulations of pesticides
- Understanding importance of a pesticide's labeling and *safety data sheet* (SDS).
- Laws & regulations about buying, storing, transporting, applying, and disposing of pesticides, spill response, and employee protection
- *Integrated pest management* (IPM) concepts
- Common pests' identification features & life cycles
- Common application equipment
- Dilution and dosage instructions
- Movement & breakdown of pesticides in the environment
- Groundwater and surface water protection
- Endangered species protection
- *Carry-over. Resistance. Phytotoxicity.*
- Hazards to pesticide handlers & first aid for pesticide exposure
- Protective clothing & safety equipment
- Mixing, loading, application, transport, storage, and disposal

CONTINUED FROM PAGE 1

Dates & Times

2018 April 23–24, 8:15–4:00 each day.

Breaks are about 60 minutes apart. Lunch break on your own is one hour. (No food or beverages will be provided.)

Location

In Kahului (zip code 96732) on the island of Maui

Registration & Study Packets

Deadline for registration is **March 23**. Enrollment is limited to 20 people.

If you have a disability and may need accommodations to participate, contact the Agricultural Diagnostic Service Center (Honolulu), (808) 956-6706, by **March 23**.

Registration form is available either from the instructor or by downloading item 9 “Form for registration” from pestworld.stjohn.hawaii.edu/pat/schedule.html. Use page 1 to register. (Page 2 is for ordering packets of study guides, if you need them.)

Registration fee **\$100** for the short course including classroom handouts but not the study guides described in the following paragraph. (No food or beverages will be provided.) If you plan to take the Hawaii Department of Agriculture’s examination for restricted use pesticide certification, read the note in the gray box below.

Study packets **\$35** for the printed version of one complete set of study guides. Downloadable versions are available free-of-charge from pestworld.stjohn.hawaii.edu/studypackets/spcatgor.html. (You are not required to buy the printed version.) You should get the study guides if you plan to study for the Hawaii Department of Agriculture’s exam for restricted use pesticide certification.

For more information contact the instructor, Charles Nagamine
PHONE (808) 956-6007 (Honolulu) or EMAIL cynagami@hawaii.edu

The \$100 fee for the short course registration does *not* cover the fee for taking the exam for *restricted use* pesticide certification. Hawaii Department of Agriculture employees will offer the exam in separate sessions. They will collect a \$25 fee at the start of each exam session. hdoa.hawaii.gov/pi/pest/pesticide-applicator-certificationrecertification-2/

Leaflets available before short course begins

For a free copy of the leaflet, *Test Your Math Skills*, contact the instructor or download it from pestworld.stjohn.hawaii.edu/studypackets/Test_Your_Math_Skills.pdf. The leaflet presents exercises and answers that will help trainees refresh basic math skills needed to understand the instructor’s calculation examples. Trainees who find the exercises difficult will get more benefit from the short course if they get tutoring before the course begins. The exercises review (1) common fractions and their decimal number equivalents, (2) rounding-off, (3) percent, (4) conversions between • seconds and minutes • ounces and pounds • fluid ounces, pints, and gallons • square feet and acres, (5) reading tables, and (6) calculating square feet of rectangular areas. These basic skills (and more) will help test-takers answer some of the questions in the restricted use pesticide certification exam.

You can download another free leaflet, *Practice Analyzing an Insecticide Label*, from pestworld.stjohn.hawaii.edu/studypackets/Practice-Analyzing-Insecticide-Label_170424.pdf. Study the examples to boost your pesticide label reading skills, which you will need to plan a pesticide treatment or to prepare for the Hawaii Department of Agriculture’s restricted use pesticide certification exam.
